Research Course in Radiation Oncology: How to Develop Research/Validation Programmes when Implementing MRI Linac?

18 – 21 October 2021 | Online

New concept

Innovative online Masterclass with a blended learning approach where pre-recorded lectures, practical exercises and web-based interactive sessions and feedback are combined.

- **Pre-recorded Lectures (available prior to the start of the course);**
- **Interactive Live Webinar Sessions in small groups with teachers where you can share views and talk through your projects;**
- **Perfect your research under a supervision of internationally renowned scientists;**
- **Learn current trends and discuss important unresolved issues with research opportunity;**
- **Exchange your experience with your peers through practical exercises and extend your network;**
